

# Documentatie Project GSM WoL

## Modificarea datelor din fisier:

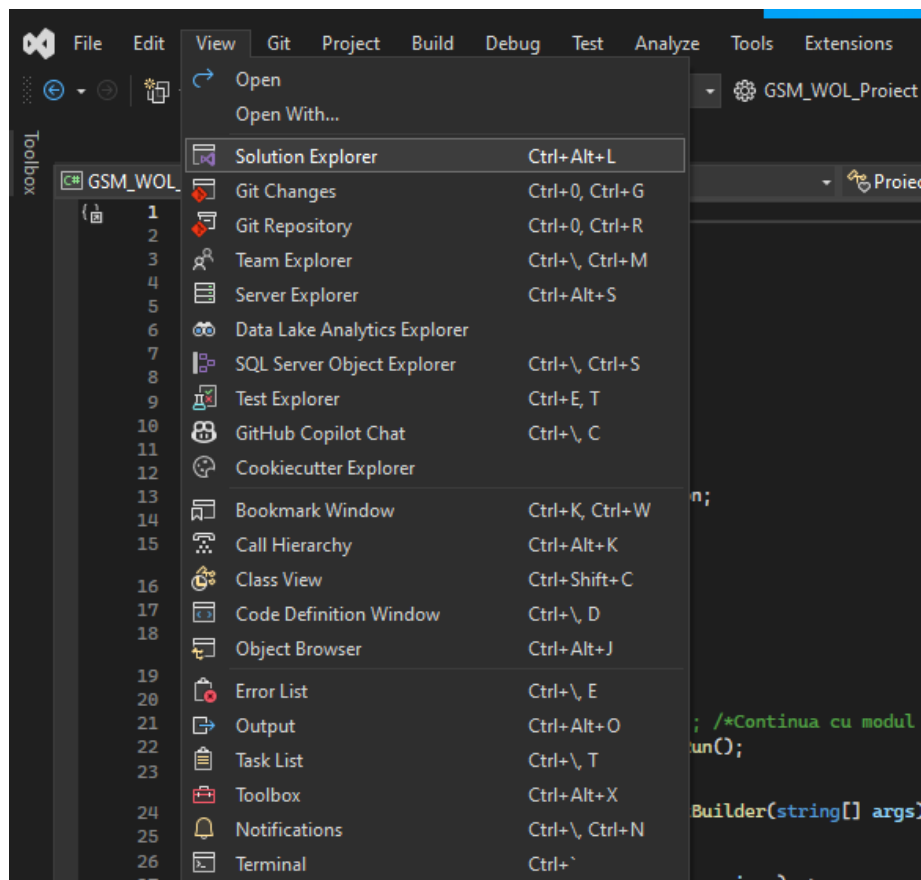

Din folderul proiectului, Proiect\_GSM\_WoL -> Solutie\_GSM\_WoL -> GSM\_WOL\_Proiect, se va deschide fisierul cu extensia “.sln”.

Din fereastra Solution Explorer din partea dreapta a ecranului, se poate selecta fisierul App.config pentru modificarea datelor utilizatorilor si a portului.

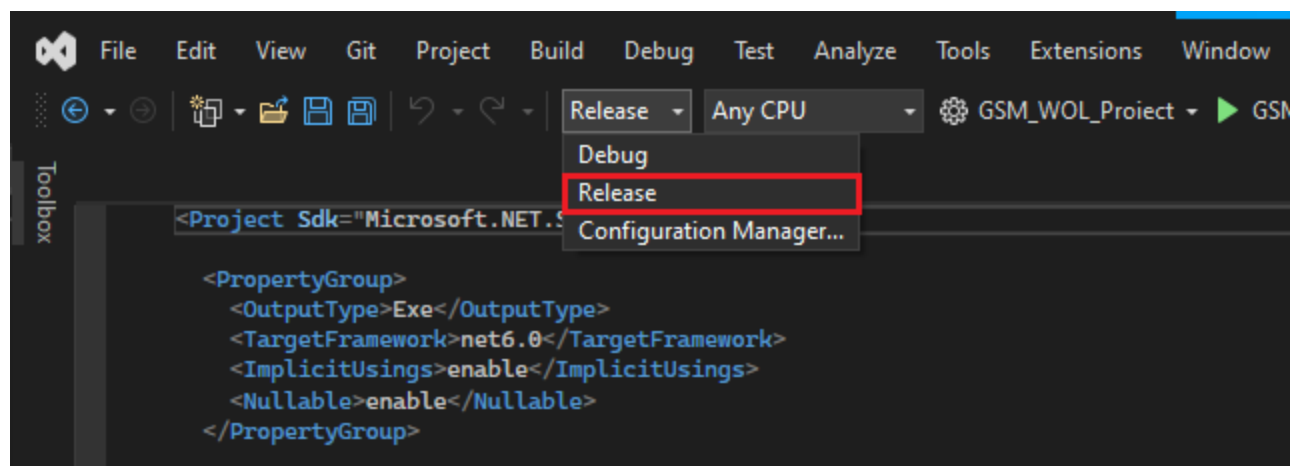

In cazul in care Solution Explorer nu este vizibil, se va selecta optiunea “View” din bara de sus, apoi se va selecta Solution Explorer.

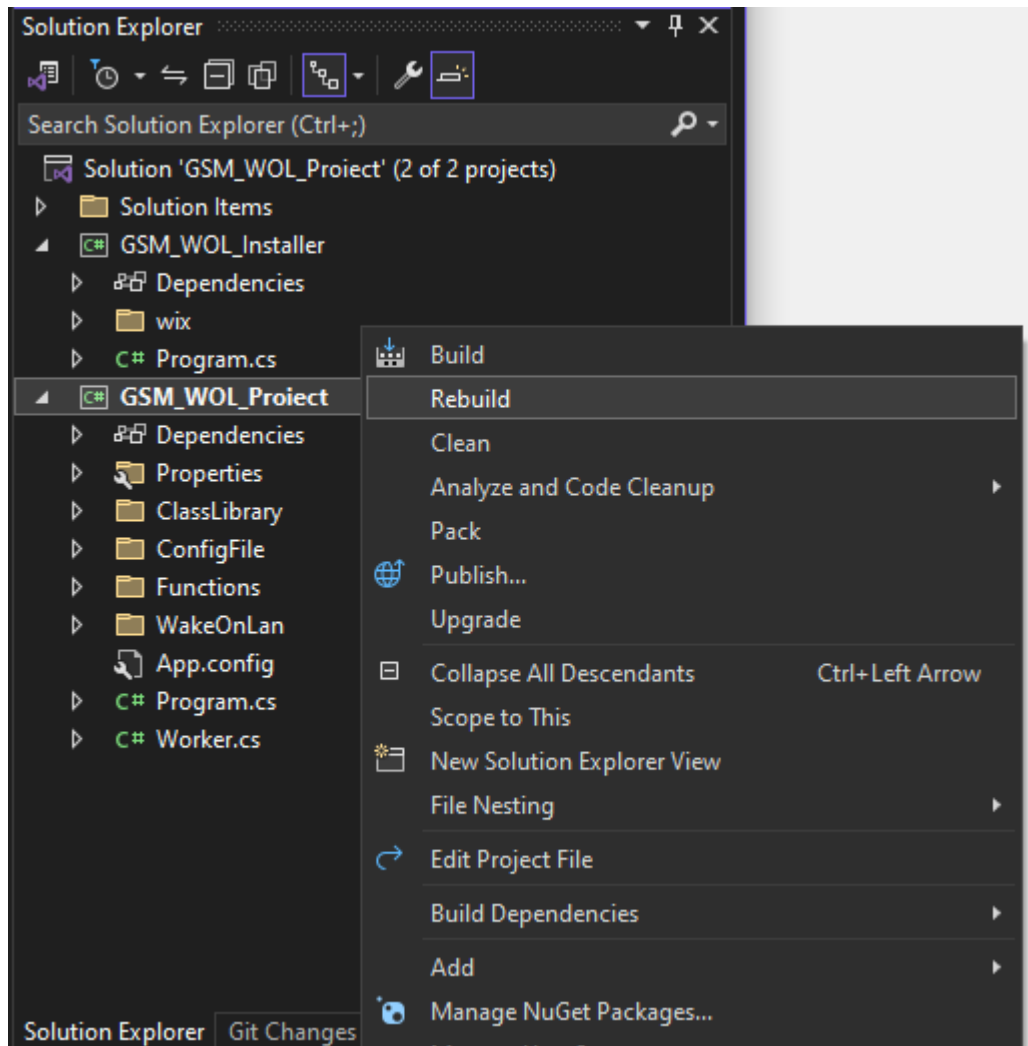

### Crearea executabilului si a Installer-ului:

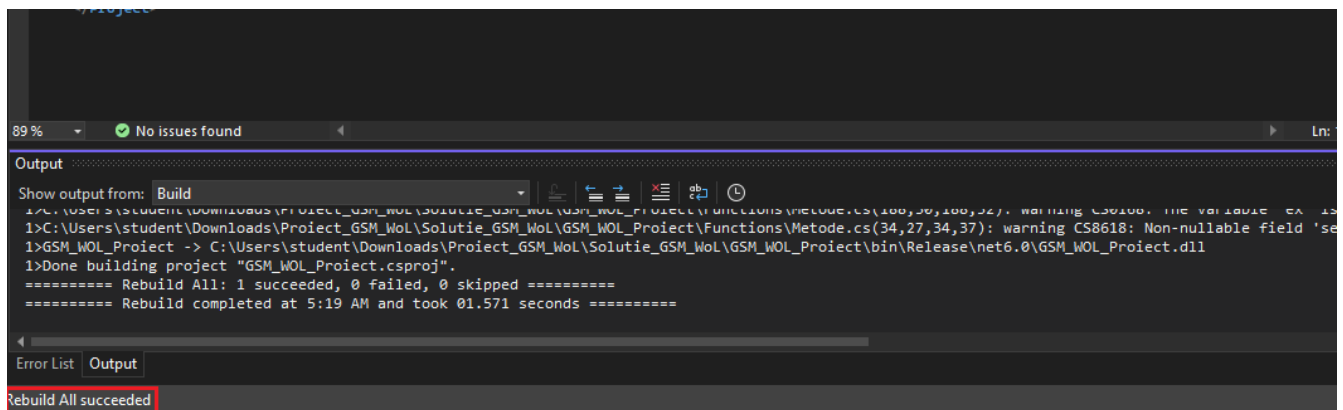

Se va selecta optiunea “Release” ca in figura de mai jos.

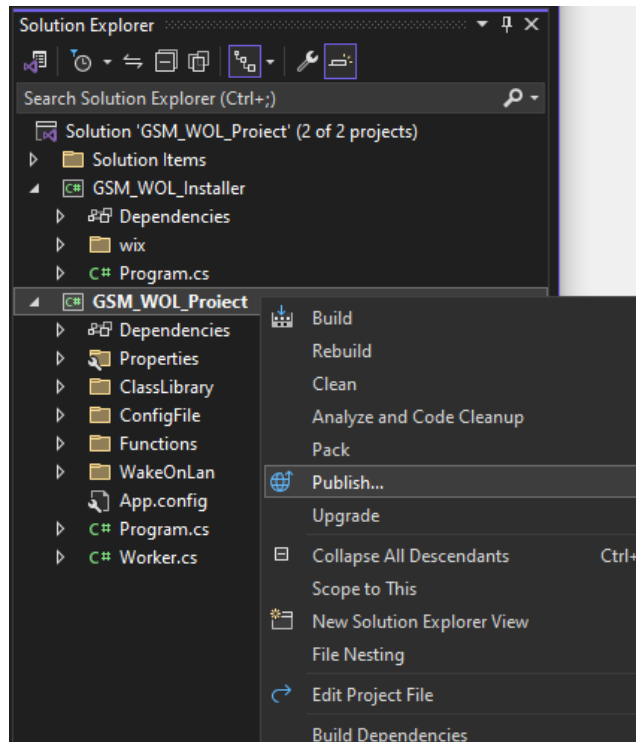

Din Solution Explorer, click dreapta pe proiectul principal (GSM\_WOL\_Proiect), apoi click pe Rebuild.

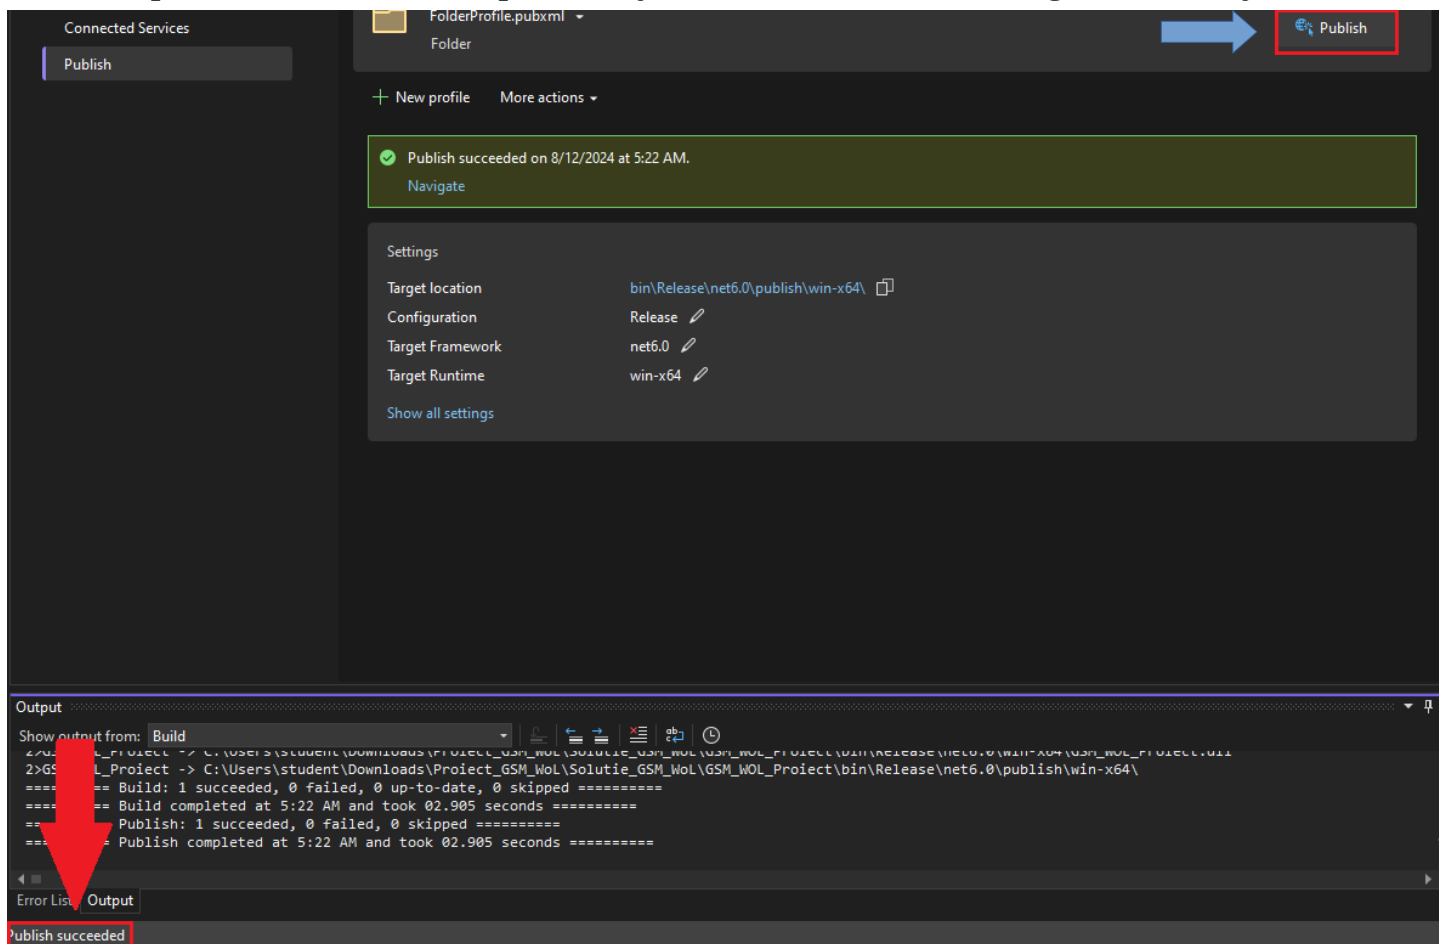

Se va astepta mesajul de confirmare in partea de jos a ecranului:

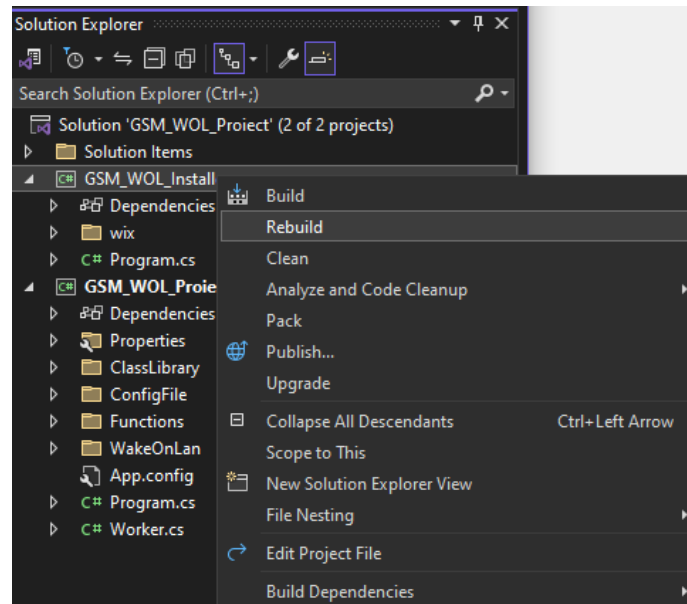

Click dreapta din nou pe proiectul principal, apoi click pe Publish.

Click pe Publish, si se asteapta mesajul de confirmare, ca in figura de mai jos:

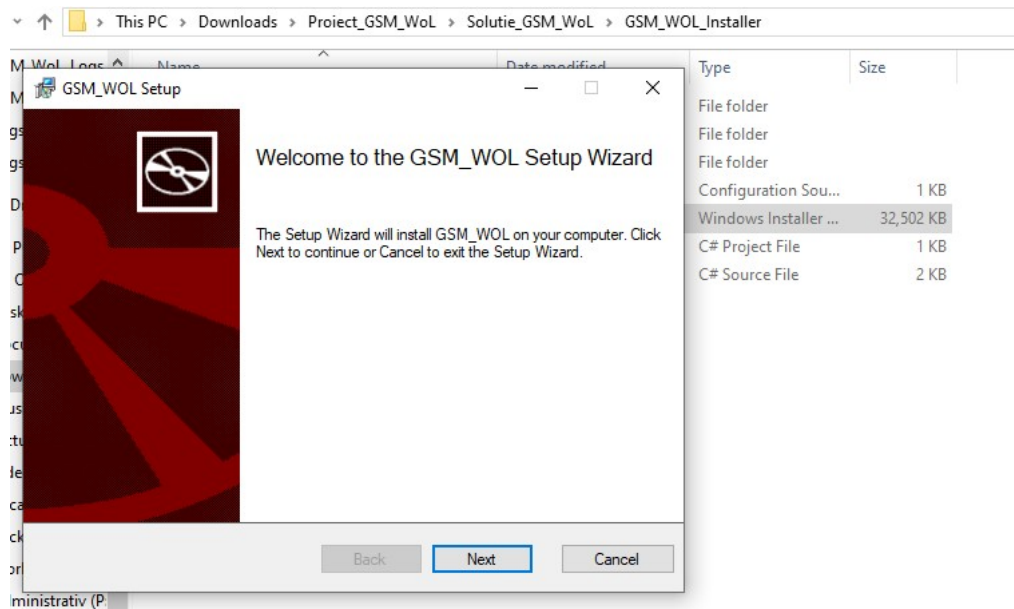

Rebuild la Proiectul Installer:

Ne intoarcem inapoi in folderul proiectului: Proiect\_GSM\_WoL -> Solutie\_GSM\_WoL -> GSM\_WOL\_Installer.

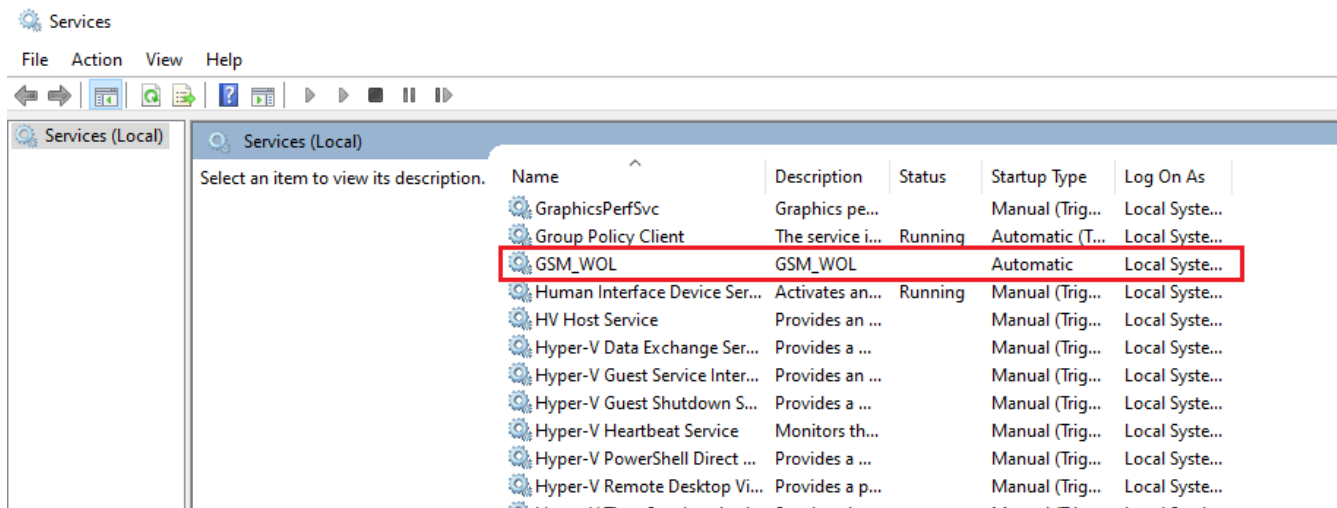

Dublu click pe GSM\_WOL, cel selectat din imaginea de mai jos:
